

Planning a trip? Don't forget this necessary travel checklist!

Your Travel Oxygen Provider

OxiMedical Respiratory specializes in providing the latest portable oxygen concentrators for oxygen users while travelling. A vacation or trip to see family provides a change of scenery and a change from the routine of daily life. Here at OxiMedical we believe arranging an oxygen rental should be as smooth and stress-free a process as possible.

Our rental advisers are fully qualified to help you make the most of your upcoming trip. For OxiMedical to provide you with the right portable concentrator, we will ask questions relating to your condition, your liters per minute, day usage, age, and so on. From the given details we can allow battery time, and any specific extra requirements, such as extra tubing/face mask, plugs, or chargers. Recent changes in airline policies have made it easier to allow patients to take our portable concentrators on board most major airlines.

Before OxiMedical can rent or sell a concentrator, we will ask you for confirmation of your oxygen-rental requirements. This can be from your general practitioner, local hospital, or any medical professional, and is an extremely important document in order for any rental to proceed. You may send your prescription or physician's statement via email to rx@oximedical.com or via fax to 888-848-1085.

For the rental to run as efficiently as possible, we will deliver your unit 2-3 business days prior to your trip, giving you the perfect opportunity to have extra time using the unit and getting to know the outstanding performance provided by your specific unit.

OxiMedical has vast experience in making vacations and weekend get-aways stress-free for many oxygen users. Our promise is to ease the

anxiety of traveling when on oxygen, giving you the confidence to rely on a reputable company that knows the industry inside and out.

Careful planning is essential for all oxygen users and lets us ensure your trip goes smoothly.
